

### *"Baby Steps"*

*We moved the garage to the back door side to create this 2 bedroom version of our popular "Best Step Forward" model. This one provides space for an extra long garage while the front entry faces the street-side walkway. The recessed porch is standard and any of our optional full width end wall covered porches are available. Just show us where you want the railing.*

*MODEL 40722 1,013 Sq.Ft.*

**HB  
NW**

"Baby Steps" is shown in this artist's print with our optional hip roof porch, deluxe porch accents, corbel in the Gable peak and a typical site-built garage. "Best Step Forward" on page 23 would have similar appearance with these options. Likewise, the standard porch version of "Baby Steps" would look similar to the page 23 end wall view.
