The artist's print shows "La Cabana" with standard siding, the standard front entry porch with optional deluxe accents, grid mullion windows and a typical site-built 24 foot wide garage facing the street on a typical 50 foot wide residential property.

# 'La Cabana'

Model 40824, 1,545 Sq. Ft.

With a small town cottage appeal this "La Casa" plan provides big country living spaces. With an inviting front porch and street-side garage location it will be welcomed on residential sites even where hard to fit setback requirements must be met. Note the rear facing views from the spacious living room and large master suite and the option of converting bedroom three into a retreat if you prefer. The angle wall niche makes the hallway disappear and the utility space offers space for a laundry tub as well as your upright freezer.
