Our artist's print shows our "Vista Real" with standard corner porch, optional lap siding, grid and boxed windows and a site-built 24 foot wide garage facing the street on a typical 50 foot wide residential property. Check out the other "Vista" plans in this book for other porches and features also available on this plan and please note that all our plans can be "flipped" to conform to your specific site needs.

'Vista Real'

Model 40826, 1,559 Sq. Ft.

The smallest of our five "Vista" plan variations, this one offers great rear facing views in a plan designed to fit 50 ft lot sizes with restricted side yard setbacks yet is available with any of our covered porch options when lot size allows. The cut corner kitchen provides a welcoming view to the standard corner porch and allows for a larger than average site-built garage with direct access to utility features rarely available in homes this size.
