The "Concordia" is shown in our artist's print with standard siding and optional 8ft covered full-width end wall porch, an optional 3rd door entry from utility, optional grid windows and a typical side wall site-built garage. See the "Portada" artist's print for a view of the alternate end wall garage location.

'Concordia'

Model 44819 w/P8 Porch, 1,698 Sq. Ft.

This larger version of our "Portada" plan provides exceptional living space in a size that fits most residential properties. The raised snack bar is wide open to the kitchen for informal gathering and the utility room offers many options including a 103" built-in laundry tub cabinet shown in this drawing. Your choice of garage location will determine the location of the standard rear entry door and window so be sure we know your site plans in advance. Identical standards and options to the Portada" plan – just a larger size.
