The artist's print shows an optional full-width hip roof porch with deluxe porch accents and corbel in the gable, architectural shingled roof, lap siding, grid windows and a typical site-built garage. Please note that our hip roof porch option includes recessed ceiling canlights as a standard feature while other porch options have surface mount ceiling porch lights standard.

'La Sierra Vista'

Model 48806 w/HP Porch, 1,864 Sq. Ft.

Here is our "Sierra Vista" floor plan with an optional full-width hip-roof covered porch. This very versatile plan works well with a variety of alternate porches, window treatments, dormers and exterior applications some of which are shown here. Compare these to the standard plan version on the opposite page and to other alternatives displayed throughout this book and choose your own features to match your lifestyle. It even will accept our 3 sided raised-hearth fireplace as a divider between the dining and great rooms as shown elsewhere.
