The artist's print shows the "Casa de Quatro" with standard corner porch and optional lap siding, architectural shingles, clerestory end wall windows, grid windows, prism dormer with wings and columns and a typical site-built garage. See "La Casa Grande" for available end wall covered porch view.

'La Casa de Quatro'

Model 56821, 2,124 Sq. Ft.

All the features of our "Casa Grande" but designed for larger family living with a fourth bedroom that easily converts to a den or media center. The added size provides nearly 800 square feet of space in the living areas alone where you can truly sense the effect of the 10 foot ceilings and wide open comfort of this very special plan. It is also available with a full width covered porch as shown on the "Casa Grande" artist's print.
