

“Casual Elegance Rev.”

We have two versions of our Anniversary Edition plan. In this version we simply reversed the bedrooms and utility room to provide for home sites that work better with a garage on the back rather than front side of the home. This moves the hallway to the opposite side as well creating additional living room floor space and slightly altered kitchen. All other features and available options remain identical in either Casual Elegance plan.

MODEL 58734 1,531 Sq.Ft.

The rear side garage-able “Casual Elegance Rev” model 58734 is shown here with optional lap siding, 20ft dormer with wings and columns, boxed windows and corners, corbels in the gable peaks, an eyebrow above the breakfast nook window and the standard corner porch with deluxe porch accents. Our front side garage version on page 9 would have similar appearance with these options.
