

# 'Vista Nuevo'

Model 58817 w/P6 Porch, 2,277 Sq. Ft.

Convert the Buena Vista features shown on the opposite page to a version that accepts a full width covered porch option we call "Vista Nuevo". On this plan drawing we show several additional optional features and you should compare them to the opposite page plan drawing standards. Here you see our optional three window tower dormer in the living room and a matching three window treatment in the end wall. Both are available with radius or rectangular clerestory windows above. The master bedroom shows the three window tower dormer in place of two standard windows. We also show you our three sided raised-hearth gas fireplace option designed specifically for these and our "Sierra Vista" model. Order the "Vista Nuevo" with or without the 6ft covered porch option.

The Artist's print shows the "Vista Nuevo" with the features described above. This view also shows optional lap siding and a 9ft dormer above the breakfast nook area and other available features described throughout this book. Compare with the more simple features shown on the opposite page and also note the two versions of computer stations available with the den and/or retreat options.
