

**“Royal Vista”**

The view is terrific from all angles in this plan designed for a street-side full sized garage. Corner windows above the sink, plus a picture window above the planning center offer abundant natural lighting to this exceptional kitchen layout. The living room features nearly sixteen lined feet of window for panoramic horizon scenes and you can see two directions from the bedroom corner windows. Den and kitchen archways create great interior lines of sight and just the right touch of elegance. Note the bonus room dimensions in the utility featuring a standard broom and linen closet. If your home site demands the garage on the opposite side see our Royal Anne on the opposite page.
