
"Royal Anne"

The sister to our "Royal Vista" plan, found on the opposite page simply reverses the utility and bedrooms placing the garage location on the rear side wall. Both plans offer a luxury bath option and are perfect candidates for our prismatic window dormer. You may want to consider our computer center option for the Den or convert it to a 3rd bedroom with full-length closet on the guest bath wall.

MODEL 60715 1,537 Sq. Ft.

Here we have an artist's print end wall view of our "Royal Anne" to show its versatility for placement on narrow lot line properties. Many of our plans including the Royal Vista on the opposite page can be placed this way with attached site-built side wall garage door facing the front access.
