W

The artist print for "La Casa de Cinco" shows the rear side view common to both models. For a front side view see the "La Casa" print on the opposite page. On this one we show you our optional tower dormer with shutters and one of many optional entry doors in place of the standard dining room window. Another common roof line option that works nicely with this plan is our Prism Dormer (shown elsewhere) placed above the standard three great room windows.

'La Casa de Cinco'

Model 60808, 2,388 Sq. Ft.

Convert the "La Casa Real" den and retreat rooms to standard 4th and 5th bedrooms. Add a 3rd full bath if you like to either plan. Or, compare the design with the "Casa Real" on the opposite page and mix the features of both to suit your own preference. These plans show how versatile you can be with room selections in our full sized triple section plans. Note "La Casa de Cinco" squares off the walls in the master bath and master bedroom. Use this plan number if that is how you desire your home to be built.
