

“Elegante Royale”

You asked for it and here it is! All the design features of our popular Elegante plan but with bigger bedrooms, larger living areas and a snack bar to the family room all built into a family sized footprint. This design intentionally divides the formal and casual living areas into four corners while effectively maintaining a sense of openness throughout with the kitchen as the center of the family universe. The covered porches front, rear and side entry are standard and include our deluxe porch accent features for visual effect.

MODEL 64828HP 2,101 Sq.Ft.

Our Artist's print shows "Elegante Royale" with the standard hip roof porch (unique to this plan), standard deluxe porch accents and sliding glass door, optional 9ft dormer with wings at portal entry, lap siding, architectural shingles and a typical site built garage. Not shown is the standard covered back yard privacy porch with matching porch accents. There are no substitute porch options available on this plan.
